

Export to South Korea

Equivalence agreement between South Korea and the EU

Signed on the 1st of February 2015 : [KOR Website](#)

- 📍 Equivalence covers processed products where the final **processing takes place in the European Union***
- 📍 Labelling and packaging are not considered as processing.

** In the Korean regulation, a processed product contains by definition raw materials of which original forms are not recognised and/or food additives. Heating, sterilisation or sanitary treatment of a food which does not cause any significant change or alteration of organoleptic characteristics is not considered as processing. Ask the importer for confirmation.*

Labelling

Labelling according to the rules of use in Korea *(the importer has the Korean wording and logo validated by his inspection body)*

- 📍 Possibility of affixing the EU logo and/or the Korean logo
- 📍 If the EU logo is used, the rules of use remain identical to the BIO EU regulation.
